

# EMANI VISHNUVARDHAN

Full-Stack MERN Developer · React.js · Next.js · Node.js

+91-7702140781 · vishnuofficial899@gmail.com · linkedin.com/in/emanivishnu · Hyderabad, Telangana, India

## PROFESSIONAL SUMMARY

Senior Full-Stack MERN Developer with 2+ years of end-to-end experience building and shipping production web applications serving 15,000+ monthly active users. Specializes in React.js, Next.js, and Node.js development across e-commerce, on-demand delivery, rental marketplace, real estate, and B2B platforms. Proven record of achieving 100/100 Lighthouse scores, reducing load times by 60%, improving backend response times by 45%, and processing \$100K+ monthly transactions with zero security incidents. Proficient across the full product lifecycle — from UI architecture and REST API design to MongoDB schema modeling, secure payment integration, CI/CD pipelines, and production monitoring.

## TECHNICAL SKILLS

**Frontend (Web):** React.js, Next.js (SSR/SSG), TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Redux, Framer Motion

**Backend & APIs:** Node.js, Express.js, RESTful API Design, JWT Authentication, Role-Based Access Control, WebSocket

**Databases:** MongoDB, Mongoose ODM, Aggregation Pipelines, Geospatial Queries, SQL, Query Optimization, Caching Strategies

**Cloud & Real-Time Services:** AWS S3, Firebase Auth, Firestore, FCM, Google Maps API, Geolocation, Crashlytics

**Payments:** Razorpay (payments, refunds, webhooks, subscriptions), Stripe (payments, refunds, lifecycle management)

**Performance:** Next.js SSR/SSG, Code Splitting, Lazy Loading, Memoization, Query Caching, Bundle Optimization

**DevOps & Tooling:** Git, GitHub, CI/CD Pipelines, Vercel, Render, Netlify, AWS, Postman

**Engineering Practices:** Agile/Scrum, Code Reviews, RESTful Design, Security Best Practices, Production Debugging, Cross-Functional Collaboration

## PROFESSIONAL EXPERIENCE

### Software Engineer (Full-Stack MERN)

May 2024 – Present

CodeFacts India | Hyderabad, Telangana, India

- Web Architecture:** Architected and deployed full-stack web applications using the MERN stack, delivering scalable solutions that improved system performance by 40% and handled 10,000+ daily API requests with 99.9% uptime.
- Next.js Performance:** Developed server-side rendered applications with Next.js achieving 100/100 Lighthouse scores, reducing initial page load time by 60% and significantly improving SEO rankings.
- Component Library:** Built a shared TypeScript component library of reusable UI components, reducing feature development time across all subsequent projects.
- API Integration:** Integrated 15+ REST API endpoints across multiple application verticals (authentication, bookings, checkout, order tracking, and notifications); standardized Axios interceptor patterns that reduced backend integration bugs.
- Backend Engineering:** Developed and maintained RESTful APIs with Node.js and Express.js, implementing JWT authentication, role-based access control, and robust error-handling middleware.
- Database Optimization:** Modeled MongoDB schemas with Mongoose ODM for complex relationships and aggregation pipelines; improved backend response times by 45% through query optimization, indexing, and caching strategies.
- Payment Integration:** Implemented PCI-compliant Razorpay payment flows processing \$100K+ monthly transactions with refund handling and webhook validation — zero security incidents or payment-related bugs reported post-launch.
- Cloud Storage:** Implemented AWS S3 integration for file storage, reducing costs by 30% while improving asset delivery speed by 50%.
- Maps & Geolocation:** Integrated Google Maps APIs, geolocation services, and a geo-fencing engine for distance-based pricing and zone-based filtering for 5,000+ active users across web platforms.

- Agile Delivery: Consistently delivered sprint features on schedule while collaborating with backend, QA, and design teams in 2-week Agile sprint cycles; participated in code reviews that reduced bug count by 25%.

## KEY PROJECTS DELIVERED

---

### **Bodegaa — Hyperlocal Grocery / E-Commerce Platform** | *Next.js, Node.js, Express.js, MongoDB, AWS S3, Razorpay*

- Built a production-ready single-vendor e-commerce platform from scratch serving 15,000+ monthly active users with full product catalog, cart, and order management.
- Achieved 100/100 Lighthouse scores in Performance, SEO, and Best Practices through Next.js SSR optimization, code splitting, and lazy loading techniques.
- Implemented secure Razorpay payment workflows with transaction tracking, refund management, and real-time order status updates.
- Developed admin dashboards with category management, analytics, user role management, and inventory tracking.
- Optimized MongoDB queries for high-traffic pages, improving response times and designing scalable database schemas.

### **RntOut — Multi-Category Rental Marketplace** | *MERN Stack, Next.js, Razorpay, Google Maps API, Firebase*

- Developed a multi-category rental marketplace for electronics, vehicles, real estate, and services with dynamic pricing and availability tracking, improving booking accuracy by 40%.
- Implemented geo-fenced search and location-based filtering using MongoDB geospatial queries and Google Maps API, enabling proximity-based results.
- Integrated Razorpay multi-transaction flows including payments, refunds, security deposits, and subscription management.
- Built real-time booking updates and push notifications using Firebase for instant user engagement.
- Created interactive map interfaces with zone management and radius-based search functionality.

### **Techmate — Service Marketplace Platform** | *React.js, Node.js, Express.js, MongoDB, Firebase, Razorpay*

- Built a full-stack web platform enabling users to discover, book, and manage verified service providers and AMC packages, with a React.js admin dashboard.
- Delivered scalable REST APIs for bookings, services, and transactions; integrated Razorpay with secure refund handling and Firebase Auth and FCM for real-time updates.
- Optimized backend queries achieving a 35% improvement in API response time; shipped the initial version within a 6-week delivery window.

### **First House / BestFinder — Real Estate Discovery Platform** | *React.js, TypeScript, Next.js, MongoDB, Firebase*

- Built a property listing and discovery web platform with advanced search filters, real-time in-app chat, inquiry workflows, and Firebase-powered push notifications.
- Delivered a full-featured MVP — from kickoff to production deployment — within 8 weeks.

### **Luxorace — Fashion E-Commerce Platform** | *React.js, Node.js, MongoDB, Firebase, Razorpay*

- Developed a fashion e-commerce platform for traditional wear with seller onboarding workflow, inventory management, payout calculation engine, and admin analytics dashboards.

### **Garuda Gases — Industrial B2B Ordering Platform** | *React.js, Node.js, Firebase, Razorpay*

- Built an industrial and medical gases ordering web platform with order scheduling, live delivery tracking, and performance optimization for low-network environments.
- Built a real-time analytics dashboard with WebSocket integration and custom reporting features used by 500+ business clients.

## EDUCATION

---

### **Bachelor of Technology — Electronics and Communication Engineering**

*Bharath University, Chennai, India*

Aug 2019 – May 2023

CGPA: 8.75 / 10
